

## **Selangor Blueprint 2011-2013**

After more than two years of having taken over in Selangor, the Pakatan Rakyat government is embarking on another exciting project: preparation of a Selangor Blueprint 2011-2013. This follows from the past two years' main programmes of Merakyatkan Ekonomi Selangor and the State Economic Stimulus Package. Here, the formation of the Blueprint will involve an unprecedented and systematic series of public consultation sessions at all 12 local and municipal councils in Selangor. Local NGOs, industry leaders, religious organisations, councillors, elected representatives and community leaders are invited and welcome to participate in these dialogues. We are inviting members of the public who are unable to attend these sessions to email us at [selangor.blueprint@gmail.com](mailto:selangor.blueprint@gmail.com) to provide their views on three main areas.

You may also leave comments and suggestions on our Facebook page, enlisted as "Selangor Blueprint 2011-2013 Consultation Process." More information can also be found at [www.selangor.gov.my](http://www.selangor.gov.my)

- 1) Infrastructure, Development and Economic Policy**
- 2) Good Governance and Transparency**
- 3) Social Issues and Community Development**

The key questions to respond to are:

- What are the main issues that require attention: immediate and mid-term?
- What areas require co-operation between the Federal and State Governments?
- What are the positive and negative issues related to the State Government's actions to date?

The Blueprint will provide for a comprehensive and holistic plan that streamlines the needs, expectations and issues faced by the public with the planning process at the State and Local government levels.

## **More on the Selangor Blueprint 2011-2013**

### **Why?**

The Selangor Blueprint is to act as a Mid-Term Review of Selangor's performance to date since March 2008. In addition, Pakatan Rakyat's existing Common Policy Platform formulated last year will now be translated into a State Government-level Plan, from philosophy and principle to action and implementation. This will also help the Selangor government identify strategic areas of policy revision and implementation in the short and medium term. For long term purposes, economic growth areas and ecosystems will be identified for Selangor.

These state-wide consultation sessions are a bottoms-up approach as opposed to a top-down methodology of obtaining feedback from the grassroots and community leaders in society. Problems faced by the

community will be identified, especially patterns that can be consistent throughout the state.

### What?

This acts as a Blueprint for “where we want to go, and how we want to get there”. It is a 3-Year Rolling Plan which is envisioned to be strategic, holistic, sustainable and achievable within the given mandate and jurisdiction of the State government.

### When?

The 12 consultation sessions begin from 21<sup>st</sup> August till 6<sup>th</sup> September 2010. The schedule for each session is as follows:

The Selangor government is also simultaneously meeting in smaller consultative sessions industry leaders (developers, manufacturers, service providers) and other community leaders (NGOs, think tanks, academics, religious groups). This will take place throughout the month of September.

The first draft of the Plan is due to be completed in October, and its final report tabled to the Selangor State Legislative Assembly in November, distributed to the public in December 2010.

Governance is both principle and action. The Selangor Blueprint will allow the opportunity of providing the *rakyat* with a commitment of both of these, from the Pakatan Rakyat government. With strategic policies and plans in place, this will allow the State Government to identify immediate areas to address in the short term. For mid-term and long-term, patterns will be identified across all 12 consultation sessions.

We look forward to your inputs and ideas faced in your specific locality, as well as suggestions for more macro and State-level issues that have not yet been addressed.
